Programming With Php Laravel Internship   **UY Systems Ltd**
02/04/2023- 25/06/2023

- Front-end and Back-end integration
- Basic PHP, MySQL with CRUD operation and validation
- integration in Laravel with MySQL along with various packages such as, Breeze, Excel Laravel, Image intervention, DomPDF, Mail Chart,bumbumimen99
- Basic JavaScript operation

MySQL / PHP / Laravel / JavaScript / Laravel Packages

PROJECT

Multivendor Ecommerce (Laravel)   https://github.com/tosabbir/multivendor ⌗

Initially, the project showcases the rudimentary operation of the e-commerce multivendor platform in which an admin can control the total application, where vendors can be able to sell products. All users can see their profile separately or use this application as their role and permission. Admin Or Vendor can see their summary archive, and manage products with a simple inventory. Add To Cart, Checkout, Order Track, Review, Cuppon, Product Return, Chat With Vendor after all maximum basic functionality of a multivendor e-commerce project tries to include here.

Khorcha (Laravel)   https://github.com/tosabbir/khorcha ⌗

Personal Income Expenses or financial management archive, which includes the CRUD system with the latest Laravel 10x followed by print in various mediums such as PDF, or EXCEL format in this project, we can summarize the entire statement according to year, month, and date wise etc.

E-commerce (Laravel)   https://github.com/tosabbir/khorcha ⌗

This is a very simple e-commerce project only the admin can add products and the user can buy products. Admin can manage products with a simple inventory. Add To Cart, Checkout, SSl-Commerce, and many other functionalities are added here.

Portfolio (PHP MySql)   https://github.com/tosabbir/khorcha ⌗

This Project was created to practice raw PHP and MySQL and how to implement it in a real project. Here Authentication, role management, permission, crud operation, from validation everything was tried to make by raw php
